CULINARY ARTS COLLEGE

2011-2012 ACSA/AISC STEEL DESIGN STUDENT COMPETITION

DESIGN INTENT

The design intent for the Culinary Arts College is to create a modern, multi-level building that serves as a hub for culinary education and community engagement. The building is designed to be a landmark structure in the urban context, featuring a prominent red steel frame and glass facade. The design emphasizes sustainability, energy efficiency, and a connection to the surrounding urban environment. The building's form is inspired by the industrial aesthetic of steel, reflecting the competition's theme. The design intent is to create a functional, aesthetically pleasing, and sustainable structure that meets the needs of the culinary arts community and the surrounding urban context.
