27th World Congress of Architects

Project Name: In-Between  
 Authors: Yuting Zhang, Yue Shi  
 Country: United States

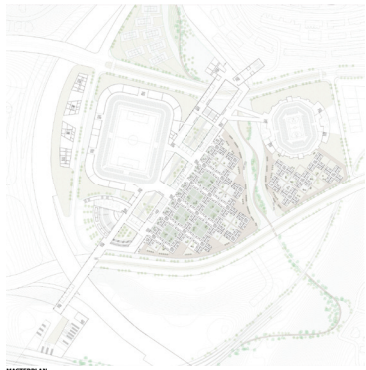

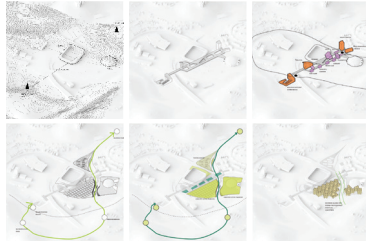

Jerusalem today is an area of nearly one million people comprising outside of its historic walled center, with many of the characteristics of any modern urban region, including a periphery of dispersed residential areas, strip malls, high-walk, job centers and sports facilities. The site Malha basin is one of them, which is now separated by the highway, and occupied by two occasionally used institutional sports facilities, a stadium and an arena with their large parking lots. It's an abandoned place between the nature and urban, intersects temporarily, daily, fragmented Jewish and Arab neighborhoods, in-between institutional facilities with few public services for daily use.

However, there is that amazing caution of history and artifact of the ancient holy city at the center, across centuries, considered a center of the Western World. The dialectical condition, exacerbated in Jerusalem while common among cities world wide, of a place with a transient center surrounded by the commonsensical, mundane, ordinary periphery of everyday urban life.

Then the question is how to develop this periphery area of Jerusalem, to be part of the central Jerusalem and remain to the older 'idea of a city', while attempt to its sustainable needs. The project then aims to define the city's left over space through redefining the existing daily life by introducing a composition of a public civic space, a landscape corridor and housing programs.

REFRAME CIVIC LIFE

MASTERPLAN

THE CIVIL SPINE

- 1. Malha neighborhood
- 2. Shopping mall
- 3. High-tech business park
- 4. Stadium arena with large stadium
- 5. Planned light rail line stop
- 6. Jewish Old City
- 7. Malha sports arena stadium
- 8. Multi-purpose arena
- 9. Educational institution
- 10. Civic Space
- 11. Stadium
- 12. Embassy Consulate
- 13. Theater Court
- 14. Cultural multi-level park
- 15. Interdisciplinary park
- 16. Commercial Building

MALHA BASIN - 'BACKYARD' OF THE CITY

UNDEFINED IN-BETWEEN SPACE

ALLEGORY OF OLD CITY
