27th World Congress of Architects

Project Name: EKMATTRA DBBL ACADEMY

Authors: Iqbal Habib - Ishtiaque Zahir - Shahnaz Parveen - Kawsary Perveen

Country: Bangladesh

EKMATTRA DBBL Academy was built as a foundation with the vision to support and change the life of destitute street children. Built on a 3.4-acre land, the idea of the project was to create a place of learning, rest, and play. The cluster design gives one a sense of the village homesteads with a courtyard or 'Uthtan' enclosed by the academic block, health centre, multipurpose facilities and the living quarter which are all bounded by natural landscape. The project is a responsible & responsive attempt to generate the pathway to exit from this vulnerable outcome of our fast growing unplanned urbanization

All the worlds. Just one world
